

Intake for New Arrivals

Everyone is welcomed as a visitor to the eco village! After half a moon, we meet and craft your future here.

First 14 days "Half moon bubble"

- help with gardening, harvesting, food prep and eco village projects
- shelter and prasad provided

Second half of moon

Become a "voyager" to freely come & go
or start "even energy exchange" by writing expectations & intentions

Beyond first moon

- registration with Vedic Eco Village and Saranagati Village (requires criminal search)
- 2 moon even energy work exchange
- 2 moon living plan

After 3 moons

- option to renew work and living plan

After 13 moons

- option to become a "villager"

*Don't be dependent on anyone else
Become self-independent
and don't be after money.
Simply produce your
bare necessities of life.*

What is Varnasrama

Daivi Varnasrama dharma is a social system that provides a structure which allows people to work according to their natural tendencies, in which people gain spiritual satisfaction and spiritual advancement by doing their daily work as an offering to God.

Varnasrama communities feature vedic education and training, food production, farms and cow care.

An ideal village has simple living and high thinking. Our land provides crops, trees and pasturing grounds for the cows, thus creating sufficient grains and production of milk and dairy.

"One day millions of people would be coming to our Hare Krishna farms because they are unemployed. And we must accept them. We must feed them. We must let them live there and they will gradually become spiritualized. We will put them to work, they will get their food and prasadam. They will hear something about Krishna and they will gradually by the millions become devotees."

Vedic Eco Village

Restoring Three Vedic Values

Cows * Land * Knowledge

We cultivate an environment of love, peace, truth, honesty, ahimsa, self-sufficiency, permaculture and cow protection

Our mission is to manifest the vision of Varnasrama community that provides sovereignty and fulfills the material and spiritual needs of our community and the next generations.

Projects

Learning Center will host Varnasrama College teaching aspects of our Vedic culture. Students learn hands-on about Permaculture Farming, Building shelters, Cows and Ox plowing & care

Traditional Craft Center for crafts, weaving cloth and natural decors.

Outdoor kitchen provides prasadam for the workers, teachers and guests. Kitchen has stove for cooking with sticks and dung, tables, storage and eating area with sink for cleaning.

On-going projects:

- Forest Management & Saw Milling
- Facilities for workers and guests
- Cob floor & insulation, plaster finish
- Rocket mass heaters
- Garden and Orchard Expansion

Future Projects:

- Nature Cure Center
- Goshala foundation & buildings
- Vaishnava Retirement Center

Farm & Cow & Ox

Farming and cow-protection provides the foundation for self-sustaining living, generating prosperity for the rest of the society. A village should be an ecologically closed unit. Cow dung fertilizers the grains & vegetables, and waste from vegetables and grains is food for cows and sheep. Surplus from this ecological cycle is sold at markets. This makes for a stable economy.

We grow Flowers, Carrots, Beets, Potatoes, Peas, Cucumber, Broccoli, Kale, Chard, Lettuce, Spinach, Cabbage, Green Beans, Zucchini, Tomato, Cherry Tomato, Eggplant, Pepper, Melon, Radish, Fennel, Squash, Asparagus, Parsnip, Corn, Millet, Kamut, buckwheat, Raspberry, Strawberry, Currants, Saskatoonberry, Gooseberry, Honeyberries (Haskaps), Apple, Pear, Cherry, Apricot, Hazelnut and Walnut trees.

We make preserves, flower infusions, jams, pickles, sauerkraut, juice and teas.
